Proven and supported by on-going quality and reliability test. AFC has built it's own in house reliability test laboratory to ensure that our products not only meet the international quality and reliability test specification such as the EN-1074-1/2 T-Key and R-Key test. But also comply with various international valves standards and specifications.

We already achieved WRAS certificate in 2011, and obtained FM approval in early of 2012, and UL for gate valve.

Today, we have obtained many international famous certificates for drinking water such as WRAS, NSF, AS, CE on certain products and our products range has expanded to double eccentric butterfly valve, rubber disc check valve, non-slam check valve, both clean water & sewage water air valve, hydraulic control valve and penstock and we always focus on water system valves.

Our vision plan is developing pressure management valve which has been proved to be a very helpful tool and economic way to save leakage rate with limited investment and get a fast return In few months and power savings.
